

PTO WORLD RANKINGS SYSTEM

The PTO Rankings system was created to identify and rank the world's greatest triathletes. It measures consistent excellence and determines the year-end bonuses payable to PTO Professionals. This isn't about favouring any series of races or races in any geographical area, but to measure talent and achievement based on the results of an athlete.

A LITTLE BIT ON HOW IT WORKS:

Based on analysis of past races, the PTO has ranked each eligible race and determined the ideal time that the top ranked athlete would achieve on the course.

With each race, an algorithm will be applied modifying the ideal time based on the course conditions on the day of the event, creating the **Adjusted Ideal Time**. For example, a strong current in the swim, high winds or scorching heat. If an athlete equals the Ideal Adjusted Time at an approved race, they receive 100 points. If they are faster or slower than the Adjusted Ideal Time, they will be awarded or deducted a point or fraction of a point for each 0.15% they are from the AIT. The PTO World Rankings will be finalised based on the average number of World Ranking points an athlete has earned for their three best races during that calendar year.
